Under the Clean Air Act Amendments of 1990, the U.S. EPA may delegate the Radionuclide NESHAP to an agency of the State which has the capability to enforce these standards and has developed an adequate plan for doing so. The California Department of Health Services (DHS) is the lead agency for regulating all radioactive materials and has accepted responsibility for the Radionuclide NESHAP Program, as per the letter from Jack S. McGurk, Chief, Environmental Health Division, to David P. Howekamp, Director, Air and Toxics Division, dated February 21, 1992. Questions regarding the delegation of the Radionuclide NESHAP Program should be referred to DHS.

Acceptance of this delegation constitutes your agreement to follow all applicable provisions of 40 CFR Part 61, including use of EPA's test methods and procedures. As of the effective date of this delegation, SBCAPCD will have primary authority to enforce the above standards. EPA will retain independent enforcement authority, and will exercise such authority in a manner consistent with EPA's timely and appropriate guidance, and our enforcement agreement. As such, all notifications and reports

required of sources by the above standards should be sent to you, with a copy to our office. The delegation is effective upon the date of this letter unless the U.S. EPA receives written notice from you or the District of any objections within 10 days of receipt of this letter. A notice of this delegated authority will be published in the Federal Register in the near future.

Sincerely,

A handwritten signature in dark ink, appearing to read 'DWM', is written over the typed name.
